SPOT 2

Prosperous energy companies are good for Louisiana...

If we hold these global companies accountable to the people of Louisiana...

This is my fight...

Make the polluters finally pay to clean up their environmental mess they left along our coast and marshes...

Then, let energy companies work without fear of lawsuits...

I'm John Carmouche....

This is my fight...

To bring jobs and oil companies back to Louisiana to build an economy that makes a difference for America...
